DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 1. Claim 1, drawn to method for assigning and storing temporary and personal identifiers, classified in class 713, subclass 202.
 2. Claims 2-17, drawn to means for enciphering transmitted information from a switching center, classified in class 380, subclass 42.
 3. Claims 18-35, drawn to a method for deciphering an enciphered signal dependent on a time to start signal, classified in class 380, subclass 35.
 4. Claims 36-41, drawn to a method for notifying the network about one or more possible encipherment procedures of the mobile station, classified in class 713, subclass 168.
 5. Claims 42-75, and 82-88, drawn to a method of controlling access links using a plurality of branches, classified in class 380, subclass 33.
 6. Claims 76, 77, and 89-98, drawn to a method to establish a control channel between a mobile station and the network, classified in class 380, subclass 34.
 7. Claims 78-81, drawn to a method to determine radio zones and uplink power, classified in class 380, subclass 270.
2. The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2132

Inventions 1-7 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention 1 has separate utility such as storing and assigning identifiers. In the instant case, invention 2 has separate utility such as enciphering transmitted information. In the instant case, invention 3 has separate utility such as deciphering an enciphered signal based on a time signal. In the instant case, invention 4 has separate utility such as specifying one or more possible encipherment procedures. In the instant case, invention 5 has separate utility such as controlling access links. In the instant case, invention 6 has separate utility such as establishing control channels. In the instant case, invention 7 has separate utility such as determining radio zones and uplink power. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Groups 2-6, the search required for Group 2 is not required for Groups 3-6, the search required from Group 3 is not required for Groups 4-6, the search required for Group 4 is not required for Groups 5 and 6, and the search required for Group 5 is not required for Group 6, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2132

3. A telephone call was made to Tadashi Horie on April 28th, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin E Lanier whose telephone number is 703-305-7684. The examiner can normally be reached on M-Th 7:30am-5:00pm, F 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703)305-1830. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
